Specialist Anodising Company Limited

creativity focused innovation for  
the global cosmetics industry

Specialist Anodising Company Limited

SACO, founded in 1985, is a leading designer and manufacturer of aluminium caps and shrouds for the international cosmetics industry. We offer component design, in-house tooling, pressing, assembly and a unique anodising service, which guarantees the highest quality and service from design to delivery.

Special colours and finishes can be applied to any product within the SACO range to differentiate your product.

Diffuser caps are now a growing part of our standard range, bespoke requirements can also be supported via our in house design and tooling team.

Our design team is capable of innovating new designs or working with a bespoke customer design to create beautiful special aluminium products.

Turning your packaging with standard bright cap into something very special is possible at SACO. This 'grenade' style Cap is innovative and produced automatically in one of 50 transfer presses.

## COMPREHENSIVE PRODUCT RANGE

With over 1500 standard caps and shrouds we offer one of the largest catalogue ranges in the world. Our skilled design team strives to add new designs to our standard range every year to meet the market trends with no tooling costs to the customers.

Pressing, anodising, assembly and decoration specialists.

100% manufacture from our UK plants.

Beautifully created anodised aluminium components including Collars, Overcaps, Jar Caps, Diffusers, Purse Sprays, Disc Top Shrouds, Bespoke Components.

Over 1,500 standard products, which helps to support zero or low tooling costs and short lead-times.

Embossed and debossed logos are available on the top face or radially around our products to enhance your brand. Here we showcase our standard in special bright purple to show our capability.

In satin silver this top hat cap with special knurl - rib and face feature allows a touch of sophistication to be added to your product.

## CUSTOMER FOCUSED

Our design and manufacturing operation is fully self-sufficient with an onsite new product development and engineering department that ensures we are able to offer flexible solutions and support short lead-times

Very reactive service, each customer is supported by a designated Key Account Manager.

Global supplier with Sales Agents worldwide.

## EXPANDING PRODUCTION

Our manufacturing runs a 24 hour day, 5 day a week operation with a capacity well in excess of 5 million components per week. This ensures our lead-times are very competitive

Over 50 Platarg transfer presses.

Automatic rack anodising plant capable of over 250 million components per year.

2nd automatic rack anodising plant introduced from 2015 to increase capacity to 550 million components per year.

10 automatic assembly machines.

3 silk screen print machines.

1 Polishing machine.

Beautiful satin silver jar cap, all our inserted components are designed and glued with precision to ensure a strong retention which is fit for functional purpose.

SACO has a wide range of standard slip liner inserts and GCMI thread inserts to suit most industry standards.

All of our aluminium components are individually loaded onto bespoke titanium pins ready for anodising. Our unique anodising belt process ensures all surfaces of the aluminium are anodised consistently every time.

## INNOVATIVE DESIGN

Customer designs are realised by one of the largest in-house teams of highly skilled tool-making engineers and designers, assisted by CAD/CAM technology. By listening to the requirements of our customers and understanding their products and target markets, we are able to create bespoke 3D creative solutions to suit their design brief.

Large range of standard colours and new range of special colours, and reactive colour matching service.

High quality 5657 and 3005 aluminium alloy is used to create bright, satin and matt finishes. Each finish is available across our full colour range.

Beaded, standard and step collars to suit most FEA and GPI sizes. Standard and special feature caps with plastic inserts to suit most FEA size pumps.

Standard triangulated caps and special feature caps with plastic screw inserts to suit most GCMI and Europa threads.

Specialist Anodising Company Limited

#### CUSTOMER SERVICE

Our strong and flexible customer service skills and attention to detail have secured and expanded our market position continuously since 1985.

Our established global network of authorised agents worldwide are able to supply and advise on the whole SACO range. To find your nearest authorised distributor please contact our head office for more information.

#### Accreditations and membership:

BS EN ISO 9001:2008 awarded in 2009 renewed 2012

Member of the EEF manufacturing organisation

ETI Base Code awarded in 2002

As well as all the standard FEA size collars with internal / external beads SACO also offers as standard more special step collars. Our design / tool making teams can also make bespoke collars to meet your requirements.

Special features can be added to the face or radially to make a statement and individualise your products. Anodised in bright black adds to the intense appeal of this cap.

Customers can choose from a wide and growing range of special colours as standard. Colour matching is also possible within our laboratory.

Our authorised network of global agents has been established to ensure a reliable source of product knowledge and supply is available to our customers worldwide.

#### WE CARE

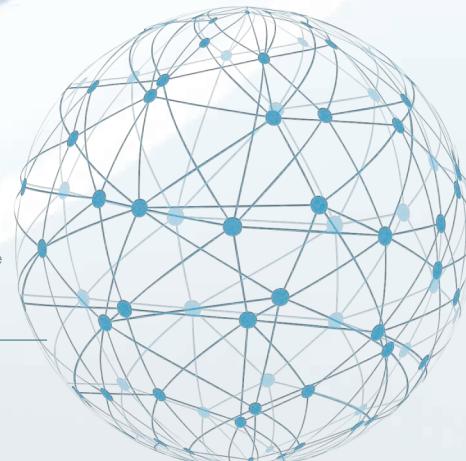

We are committed to implementing environmentally responsible policies throughout our operation and pride ourselves on the eco-friendly initiatives we have applied through our business.

Through constant monitoring, we make sure that no methods we use to produce our products create excessive carbon emissions. Our policy of adopting eco-friendly processes ensures we are fully compliant with all EU legislation.

We employ environmentally responsible processes throughout our business.

We constantly monitor eco-friendly performance and we are committed to continue to reduce our carbon footprint.
